

BLACK OUT WINDOW RP-SK

- ✓ High insulation value
- ✓ Stepless black-out from 0-100%
- ✓ Uniform light dividing
- ✓ Applicable in sidewall or roof
- ✓ Made entirely of plastic and stainless steel
- ✓ Easy assembly
- ✓ Flexible dimensions
- ✓ Modular system

Entrance of daylight into your barn is necessary to meet the current welfare requirements. It is essential getting the daylight well distributed, with the right intensity to your animals. This way you prevent direct sunlight coming in and there is still enough daylight for your animals. With the Scan-Air blackout window you have the right window to perfectly control the daylight entry into your barn. This blackout window can both be used in the side wall and in the roof.

Scan-Air has developed a unique darkening system with which the windows can be steplessly blacked out from 0-100%. This system works with integrated counter rotating valves, so that all moving parts are protected against dust and/or moisture. The valves are spring-closed, and are opened by a hand winch or motor. Per barn is checked which type and which size is suitable for the situation in question. In this way the system is made entirely according to your wishes and to the welfare requirements for your animals. The Scan-Air blackout window panels are made entirely of plastic and stainless steel, which guarantees a long lifetime. For every application we can make a suitable window.

Technical data RP-SK

Type Window	Installation dimensions			Net surface (cm ²)	Pull force (kg)	Stroke length (mm)
	W	H	D			
DK-SK 1026-1250	1026	1250	200	11.800	6	300
RP-SK 2006-500	2006	500	200	8.800	7,5	300
RP-SK 2251-500	2251	500	200	9.900	7,5	300
RP-SK 2496-500	2496	500	200	11.000	7,5	300

Dimensions custom made windows DR-SK:

Width:	903 / 1026 / 1148 / 1271 mm
Height:	800 – 1300 mm (each step possible)
Depth:	200 – 500 mm (in steps of 25 mm)

Dimensions custom made windows RP-SK:

Width:	658 – 2618 mm (in steps of 122.5 mm)
Height:	400 – 1120 mm (each step possible)
Depth:	200 – 500 mm (in steps of 25 mm)

About Scan-Air

Scan-Air is a leading manufacturer in the field of ventilation, daylight and pop-hole systems. For over 25 years we are producing high quality products with our advanced machinery and our dynamic organization. Characteristic of Scan-Air's products is the use of a well thought-out building system, which enables us to offer a suitable solution for every application. The use of plastic and stainless steel materials guarantee a long lifetime.

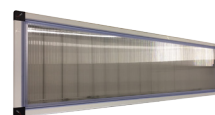

Scan-Air offers a complete package of ventilation, daylight and pop-hole solutions. With our knowledge and expertise in these fields, we can design the suitable total concept for your barn.
